## Hazards Of Wildlife

# Car / Deer Collision Facts

## What Are the Facts?

- Although most car-deer collisions occur between the months of October and December, a car-deer collision can occur at any time during the year.
- Most car-deer collisions occur between 6PM and Midnight.

# Car / Deer Collision Facts

- Rural, 2 lane roadways are the sites of the most car-deer incidents, but deer can also be found in densely populated areas.

# Safe Driving Tips

- Use special caution in areas that are posted with deer crossing signs.

Remember, if you see one deer, there are sure to be others nearby. Slow your vehicle down and

# Safe Driving Tips

- Do not swerve to avoid hitting a deer.

It is better to collide with the deer than to collide with another vehicle or roadside

# Safe Driving Tips

- Do a visual sweep of the surrounding fields as you are driving. You will possibly be able to see a deer before it comes onto the roadway, and can adjust your speed accordingly.
- Use your high beams if no traffic is approaching. They will illuminate the eyes of deer sooner than low beams, allowing

# Safe Driving Tips

- Drive carefully and at a safe speed!
